Date : October 2026

ABSTRACT

The Consulting Intelligence Platform is a centralized system that connects clients, projects, knowledge and decision support. It streamlines workflows for faculty and project evaluators and enhances data-driven consulting and evaluation through a unified interface, a knowledge repository, automated tracking and an analytics dashboard.

PROBLEM STATEMENT

- Client and project data remain disconnected.
- Knowledge resources are hard to share and access.
- Limited data-driven decision support.
- Manual tracking leads to errors and delays.
- Silos create inefficiency and slow decisions.

OBJECTIVES

- Centralize client and project management.
- Facilitate knowledge sharing and documentation.
- Provide data-driven decision support for evaluators.
- Improve collaboration among faculty and evaluators.
- Scalable and user-friendly system design.

SYSTEM ARCHITECTURE

Faculty / Evaluators

▼

Frontend (User Interface)

▼

Backend API (Business Logic)

▼

Database

▼

Insights & Notifications

1. **Frontend** — User interface for faculty and evaluators
2. **Backend API** — Handles business logic and data processing
3. **Database** — Stores clients, projects, knowledge and tasks data
4. **Knowledge Repository** — Document management and search
5. **Analytics Engine** — Data analysis and decision support

KEY FEATURES

- **Unified Interface**
- **Automated Tracking & Notifications**
- **Knowledge Repository**
- **Analytics Dashboard**
- **AI-Powered Insights (Planned)**
- **Knowledge Search**

TECHNOLOGIES USED

- **Frontend:** React.js or Angular
- **Backend:** Node.js (Express) or Java Spring Boot
- **Database:** PostgreSQL or MongoDB
- **Analytics:** Python, Pandas / NumPy (planned)
- **Deployment:** Cloud hosting & containerization (Docker / Kubernetes planned)

DATABASE DESIGN & PLATFORM PREVIEW

Database Design (ER Overview)

Client & Project Dashboard

Knowledge Repository & Search

Task Tracking & Notifications

EXPECTED OUTCOMES

- ✓ Improved efficiency in client and project handling.
- ✓ Better collaboration through knowledge sharing.
- ✓ Data-driven insights for faculty and evaluators.

CONCLUSION & FUTURE SCOPE

CONCLUSION

A unified platform for smarter management and stronger decision support. Built for today, evolving for tomorrow — roadmap features will drive future impact.

FUTURE SCOPE

- AI-Powered Consulting Recommendations
- Advanced Analytics & Reporting Dashboards
- Mobile App for On-the-Go Access
- Integration with External Academic Systems
